Education

Medi-Caps University Indore, India

Bachelor of Technology in Artificial Intelligence; GPA: 8.32/10 *Jul 2024 – Jun 2028*

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Machine Learning, Artificial Intelligence, Computer Networks, Database Management Systems

Technical Skills

Languages & Core: Python, SQL, Data Structures & Algorithms
Machine Learning: Supervised & Unsupervised Learning, Deep Learning (ANNs, CNNs, RNNs, LSTMs), Feature Engineering, Hyperparameter Tuning, Model Evaluation (Precision, Recall, F1, ROC-AUC)
NLP & LLMs: Transformers, Attention Mechanisms, Encoder-Decoder Architectures, Prompt Engineering, Fine-Tuning, LLM Evaluation, Retrieval-Augmented Generation (RAG), Vector Search, Agentic AI
MLOps & Deployment: MLflow, Experiment Tracking, Model Registry & Versioning, DAGsHub, Git, Conda, CI/CD for ML, REST-based Inference Pipelines, Streamlit, TensorBoard
Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas
Tools: Git/GitHub, Gemini API, Jupyter, Linux

Experience

Student AI Developer Remote

Nexora AI (Self-Initiated AI Development Venture) *May 2024 – Sep 2025*

- Built AI-powered applications leveraging large language models, NLP, and deep learning workflows to automate intelligent decision-making tasks
- Improved response quality and reasoning consistency by an estimated 20-30% through iterative prompt engineering and structured evaluation pipelines
- Designed and deployed REST-based inference pipelines enabling scalable, real-time model integration for production-style AI applications

Open Source Engineering Contributor Remote

GitHub – Open Source Projects *Dec 2025 – Present*

- Diagnosed and resolved IDE debugging and stability issues, improving error visibility and overall developer experience
- Reduced redundant logging and rendering overhead through targeted performance profiling and code optimization
- Collaborated cross-functionally on issue triaging, code reviews, and testing across multiple active open-source repositories

Virtual Experience Programs

- **Deloitte Technology Consulting**: Business analysis, technology consulting, and digital transformation simulation
- **JPMorgan Chase Software Engineering**: Financial software engineering, debugging, and secure coding simulation
- **Cisco Networking & Cybersecurity**: Enterprise networking and cybersecurity simulation

Projects

MLOps Experiment Tracking & Model Registry System | *Python, MLflow, Scikit-learn, DAGsHub, Git, Conda*

- Engineered an end-to-end MLOps pipeline with MLflow for experiment tracking, model versioning, and reproducibility across 20+ experiments
- Achieved 82% R^2 using an optimized ElasticNet model with automated metric logging (RMSE, MAE, R^2) and remote tracking via DAGsHub

Bank Customer Churn Prediction System | *Python, TensorFlow, Keras, Streamlit*

- Built an ANN-based churn classifier on 10,000+ banking records, achieving 84-88% classification accuracy
- Implemented feature engineering and dropout regularization; monitored training via TensorBoard and deployed real-time inference through Streamlit

Student Performance Prediction System | *Python, Scikit-learn, Pandas, NumPy*

- Developed a regression-based ML system on 1,000+ student records, achieving 88% R^2 across 8+ benchmarked models
- Built reusable, scalable preprocessing pipelines using ColumnTransformer, OneHotEncoder, and StandardScaler

Publications & Research

Nexora CognitionGraph Framework – Research Author

- Proposed an LLM + knowledge graph architecture for multi-step reasoning and contextual understanding tasks
- Analyzed structured reasoning workflows against traditional prompt-based approaches for consistency and accuracy
- Explored concurrency and scalability challenges in AI tutoring and intelligent learning systems

Leadership & Additional Information

- **Leadership**: Event management and public speaking experience through university and student-led initiatives
- **Interests**: Applied ML systems, quantitative research, MLOps infrastructure, and AI-driven financial technology
